# YOUR INVITATION

The North Australia Beef Research Council (NABRC) will once again host the 'Northern Beef Research Update Conference' (NBRUC). The next conference will be held in Darwin between 22 and 25 August 2023.

The conference organising committee is pleased to offer your organisation an opportunity to provide sponsorship of the Conference. This is an opportunity for your company to demonstrate support for this event, to increase customer contact, and pursue business opportunities in the beef industry.

## ABOUT THE CONFERENCE

### What is NBRUC?

NBRUC is the pre-eminent conference providing participants with the latest results and technical information about key areas of beef cattle research and management in northern Australia.

NBRUC is also an excellent networking opportunity for people working in, or interested in, the northern Australia beef industry.

### Who will be attending?

Over 200 researchers, extension officers, industry advisers, agribusiness representatives, producers and students involved or interested in the northern Australia beef industry are expected to attend NBRUC.

### What topics will be covered?

This year's Recipe for Success theme will feature presentations from leading industry researchers who will review and report on recently completed, and ongoing research projects, that support the north Australian beef industry to continue to serve up a top-quality product by improving profitability, resilience and sustainability.

### What else will be happening at NBRUC?

In addition to the technical program there will be three social functions and field trips. NBRUC has a reputation of not only providing the latest technical information but also providing social events that encourage and foster networking opportunities; most importantly delegates are encouraged to have fun.

### Who is NABRC?

NABRC connects producers, researchers and industry stakeholders to drive improved production in Australia's northern grassfed beef industry.

As an independent association, NABRC breaks down barriers between research scientists and grassroots producers to enrich research and simplify adoption. We draw on the knowledge, insight and expertise of its vast network to prioritise and influence RD&E/A efforts in northern Australia.
